Summary

Senior Software Engineer with 3+ years building enterprise solutions on Microsoft Dynamics 365 Finance and Operations (D365 F&O) and the wider Microsoft stack: X++, C#/.NET, SQL Server and Azure. I take work from requirements to production: ERP extensions, integrations with banks and external systems, reporting, production support and CI/CD. Microsoft Certified Solution Architect Expert (MB-700) and DevOps Engineer Expert (AZ-400); quick to pick up new platforms and languages when a project needs them.

Experience

Senior Software Engineer · Novum LLC

05/2023 – Present · Baku, Azerbaijan · international team, enterprise clients

- Built a vendor payment integration between D365 F&O and a commercial bank: XML payment documents, customs declaration data from a state service, and a parallel attachment service (5 concurrent uploads, 90+ documents per batch); taken through UAT to production.
- Delivered a multi-company bulk settlement engine for customer and vendor transactions (settle and undo) with three entry points: the F&O UI, Excel Online and an OData API used by an external 1C accounting system; batch processing handles requests of up to 7,000 lines with cross-company runs and safe status handling.
- Built an HR orders platform for two airlines: order generation, consolidation, a 9-step approval workflow and SSRS output for 63 order types under national labor law.
- Delivered Finance and Procurement features with Chain of Command extensions and SSRS: multi-currency three-way matching across legal entities, invoice prints with payment-currency totals, purchase agreements, fixed assets, inventory journals.
- Supported production: diagnosed and fixed defects in bank, sales-posting and journal customizations, wrote runbooks, and coordinated production data fixes with Microsoft Support.
- Own the path to production: Azure DevOps pipelines, Git/TFVC, LCS deployments, Docker/AKS for .NET services, developer environment setup and upkeep.

Junior Java Developer (bootcamp) · Matrix Training Center

12/2021 – 10/2022 · Baku, Azerbaijan · Java, Spring Boot, PostgreSQL

Earlier (2014 – 2022): electrical engineering, technical support, customer service and hospitality roles.

Skills

ERP: Dynamics 365 Finance and Operations (Finance, Procurement, HR, Inventory), X++, Chain of Command, Data Entities, OData / Custom Services, Business Events, SSRS, DMF, SysOperation / Batch, Workflow, Security, LCS

Backend & integration: C#, .NET, ASP.NET, SQL Server / T-SQL, REST and OData APIs, OAuth 2.0, XML / JSON, API gateways, Python (automation, bots)

DevOps & cloud: Azure DevOps (YAML pipelines), Git, TFVC, Docker, Kubernetes (AKS), Azure

Languages: Russian (native), Azerbaijani (native), English (intermediate, B1)

Certifications

Microsoft Certified (all active, verify on Microsoft Learn):

- Dynamics 365 Finance and Operations Apps Solution Architect Expert (MB-700), 2025
- Dynamics 365 Finance and Operations Apps Developer Associate (MB-500), 2025
- DevOps Engineer Expert (AZ-400), 2024 · Azure Developer Associate (AZ-204), 2024 · Azure Fundamentals (AZ-900), 2023

Education

Bachelor of Electrical, Radio and Telecommunications Engineering

Azerbaijan Higher Military Aircraft School · Baku, Azerbaijan · 2009 – 2013
