Summary

Senior Software Engineer with 3+ years building backend integrations and business applications on the Microsoft stack: C#, ASP.NET, X++, SQL Server and Azure. I connect enterprise systems with banks, accounting platforms and external APIs (REST, OData, XML, OAuth 2.0) and ship them through Azure DevOps CI/CD. Microsoft Certified DevOps Engineer Expert (AZ-400) and Azure Developer Associate (AZ-204); I also build Python services and bots, and pick up new languages and platforms quickly.

Experience

Senior Software Engineer · Novum LLC

05/2023 – Present · Baku, Azerbaijan · international team, enterprise clients

- Built a payment integration with a commercial bank's B2B API through an API gateway: XML payment documents, token-based authentication, customs declaration lookups from a state service, and a parallel attachment upload service (5 concurrent uploads, 90+ documents per batch); delivered through UAT to production.
- Designed an OData API for bulk settlement consumed by an external 1C accounting system, alongside Excel Online and UI entry points; multi-company batch processing for requests of up to 7,000 lines with atomic status transitions and full error capture; integrated a central-bank exchange-rate service over OAuth 2.0.
- Built a document generation platform for two airlines: 63 HR order types rendered from structured data, with a 9-step approval workflow and API access.
- Extended business logic in Microsoft Dynamics 365 Finance and Operations (X++, C#): finance, procurement and reporting features across multiple legal entities and currencies.
- Own delivery and operations: Azure DevOps CI/CD (YAML), Git/TFVC, Docker and AKS for .NET services, environment upkeep and production support.

Junior Java Developer (bootcamp) · Matrix Training Center

12/2021 – 10/2022 · Baku, Azerbaijan · Java, Spring Boot, PostgreSQL

Earlier (2014 – 2022): electrical engineering, technical support, customer service and hospitality roles.

Projects

AlphaScout · Python, Docker, SQLite, APScheduler – Telegram bot that scans prediction markets and scores trading signals with LLMs; multi-provider LLM gateway with fallback and non-retryable error handling, per-user settings; deployed with Docker on a VPS, running in paper-trading mode.

Ekatalog · TypeScript, Next.js, tRPC, Prisma, BullMQ, Elasticsearch – price aggregator for Azerbaijan (in development): monorepo with background scraping jobs and search.

.NET demos on GitHub – integration-service, Ocelot API gateway, Azure Service Bus, SOAP service.

Skills

Languages: C#, X++, Python, SQL, TypeScript (projects), Java (bootcamp)

Backend & integration: .NET, ASP.NET, REST, OData, SOAP, XML / JSON, OAuth 2.0, API gateways (Ocelot), Azure Service Bus, Postman

Data: SQL Server / T-SQL, PostgreSQL, SQLite, Elasticsearch (projects)

DevOps & cloud: Azure DevOps (YAML pipelines), Git, Docker, Kubernetes (AKS), Azure, Linux

ERP: Dynamics 365 Finance and Operations (X++, Data Entities, SSRS, Workflow), 1C integration

Languages spoken: Russian (native), Azerbaijani (native), English (intermediate, B1)

Certifications

Microsoft Certified (all active, verify on Microsoft Learn): DevOps Engineer Expert (AZ-400), 2024 · Azure Developer Associate (AZ-204), 2024 · D365 F&O Solution Architect Expert (MB-700), 2025 · D365 F&O Developer Associate (MB-500), 2025 · Azure Fundamentals (AZ-900), 2023

Education

Bachelor of Electrical, Radio and Telecommunications Engineering

Azerbaijan Higher Military Aircraft School · Baku, Azerbaijan · 2009 – 2013
